Part 22.

1.2. The Administrator has delegated the authority to issue complaints under Section 14 of FIFRA, 7 U.S.C. § 136l, to the Regional Administrator of EPA Region 10, who has redelegated this authority to the Director of the Office of Compliance and Enforcement in Region 10.

Docket Number: FIFRA-10-2014-0141
Complaint and Notice of Opportunity
For Hearing In the Matter of:
Pacific Air Research, Inc.

U.S. Environmental Protection Agency
1200 Sixth Avenue, Suite 900
Seattle, Washington 98101
206-553-1037

1.3. Pacific Air Research, Inc. (“PAR” or “Respondent”) is hereby notified that Complainant alleges Respondent violated the provisions identified herein and seeks the assessment of a civil administrative penalty against Respondent, for alleged violations of Section 12(a)(2)(G) of FIFRA, 7 U.S.C. § 136j(a)(2)(G). This Complaint also provides notice of Respondent’s opportunity to request a hearing.

II. STATUTORY AND REGULATORY FRAMEWORK

2.1. Under Section 2(s) of FIFRA, 7 U.S.C. § 136(s), the term “person” means “any individual, partnership, association, corporation, or any organized group of persons whether incorporated or not.”

2.2. Under Section 2(u) of FIFRA, 7 U.S.C. § 136(u), the term “pesticide” means, among other things, any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest.

2.3. Under FIFRA Section 12(a)(2)(G), 7 U.S.C. § 136j(a)(2)(G), it is unlawful for any person to use any registered pesticide in a manner inconsistent with its labeling.

2.4. Pursuant to FIFRA Section 14(a)(2), 7 U.S.C. § 136l(a)(2), and 40 C.F.R. Part 19, EPA may assess a civil penalty of not more than \$750 for a first-time violation and \$1,100 for subsequent violations, per product, for pesticides that are non-classified or classified as general use.

III. GENERAL AND FACTUAL ALLEGATIONS

3.1. Respondent, located at 660 Avenue C, White City, Oregon 97503, is a corporation organized and/or existing under the laws of the state of Oregon.

3.2. Respondent is a “person” as that term is defined in Section 2(s) of FIFRA, 7 U.S.C. § 136(s).

3.3. Respondent’s business includes the application of pesticides to provide pest control services to the public.

3.4. Respondent is an applicator not included in Section 14(a)(1) of FIFRA, 7 U.S.C. § 136l(a)(1), who holds or applies registered pesticides, or uses dilutions of registered pesticides, only to provide a service of controlling pests without delivering any unapplied pesticide to any person so served as described in Section 14(a)(2) of FIFRA, 7 U.S.C. § 136l(a)(2), as defined in Section 2(e)(1) of FIFRA, 7 U.S.C. § 136(e)(1).

3.5. Respondent is an “applicator” within the meaning of FIFRA section 14(a)(2), 7 U.S.C. § 136l(a)(2).

3.6. On October 16, 2013, Respondent applied the pesticides Accord XRT II (EPA Reg. No. 62719-556), Element 4 (EPA Reg. No. 62719-40), Oust XP (EPA Reg. No. 352-601), Polaris AC (EPA Reg. No. 228-570), and Induce (EPA Reg. No. 5905-50091) by aerial application to a forestry unit owned by Crook Timberlands, LLC (“Crook”) called “Squaw 2013,” located in Curry County, Oregon.

3.7. On October 16, 2013, Respondent applied the pesticides Accord XRT II and Weedone LV6 (EPA Reg. No. 71368-11) along with an adjuvant, Forest Crop Oil, by aerial application to a forestry unit owned by Crook called "Squaw 08," located in Curry County, Oregon.

3.8. On October 16, 2013, Respondent applied the pesticides Element 4 and Weedone LV6 along with an adjuvant, Forest Crop Oil, by aerial application to a forestry unit owned by Mr. Kaufman, herein referred to as the "Kaufman" site, located in Curry County, Oregon.

3.9. On October 16, 2013, Respondent loaded its helicopter stationed at the Squaw 2013 site with the pesticides Element 4 and Weedone LV6 along with an adjuvant, Forest Crop Oil, for the aerial application to the Kaufman site.

3.10. According to the aircraft Global Positioning System ("GPS") flight track data collected by the Oregon Department of Agriculture ("ODA"), the Respondent flew numerous trips over the Cedar Valley while transporting pesticides from the mix load site at Squaw 2013, on the western side of Cedar Valley, to the aerial application on the Kaufman site on the eastern side of Cedar Valley.

3.11. The aircraft GPS flight track data indicates the flight path between Squaw 2013 and the Kaufman site was in the vicinity of the Cedar Valley residents.

3.12. The active ingredient in Element 4 is triclopyr.

3.13. The active ingredient in Weedone LV6 is 2,4-D.

3.14. Element 4 and Weedone LV6 are each non-classified or classified as general use pesticides.

3.15. On October 23, 2013, an inspector with the ODA began an investigation into the Respondent's October 16, 2013, applications. ODA initiated the investigation in response to numerous complaints from Cedar Valley residents stating that they observed an odor during the October 16, 2013 application or were experiencing adverse health effects just after the application.

3.16. The ODA inspector collected a total of 11 foliage samples, including one sample from each treated site and seven samples (Sample Numbers: 140147-1B through 140147-7B) from four private properties in the Cedar Valley which are located between the forestry units Squaw 2013, Squaw 08 and the Kaufman site.

3.17. The vegetation samples were analyzed by the ODA Laboratory Services.

3.18. ODA Laboratory Service analysis showed residues of triclopyr and 2,4-D in Sample Number 140147-2B.

3.19. ODA Laboratory Service analysis showed residues of 2,4-D in Sample Number 140147-3B.

3.20. On January 13, 2014, the ODA inspector requested ODA Laboratory Services relook at the sample analyses for Quality Assurance/Quality Control purposes and determine whether analysis of the residential samples found quantifiable amounts below the minimum detection limit ("MDL"). ODA Laboratory Services reported that they found quantifiable

results for triclopyr below the MDL on Sample Number 140147-3B. Therefore, both Sample Numbers 140147-2B and 140147-3B had residues of triclopyr and 2,4-D.

3.21. Sample Number 140147-2B was collected from an apple tree in the yard of a Cedar Valley resident who reported smelling an odor near the time of the application and feeling ill later that evening.

3.22. Sample Number 140147-3B was collected from an ornamental tree in the yard of a Cedar Valley resident who reported a "heavy smell of chemical" which affected his breathing and made his eyes burn near the time of the application. This individual also continued to experience symptoms for several days after the application.

3.23. The EPA approved label for Element 4 states in part:

Do not apply this product in a way that will contact workers or other persons either directly or through drift. Only protected handlers may be in the area during application.

Do not apply Element 4 directly to, or otherwise permit it to come into direct contact with, cotton, grapes, peanuts, soybeans, tobacco, vegetable crops, flowers, citrus, or other desirable broadleaf plants. Do not permit spray mists containing Element 4 to drift onto such plants.

3.24. The EPA approved label for Weedone LV6 states in part:

Do not apply this product in a way that will contact workers or other persons either directly or through drift. Only protected handlers may be in the area during application.

Do not apply this product directly to, or permit spray mist to drift onto cotton, okra, grapes, tomatoes, fruit trees, vegetables, flowers or other desirable crop or ornamental plants which are susceptible to 2,4-D herbicide. Do not apply near susceptible plants since very small quantities of the 2,4-D will cause severe injury during the growing or dormant periods.

3.25. Respondent applied or used Element 4 in such a way that it contacted other persons either directly or through drift and applied the product directly to, or otherwise permitted it to come into direct contact with, cotton, grapes, peanuts, soybeans, tobacco, vegetable crops, flowers, citrus, or other desirable broadleaf plants.

3.26. Respondent applied or used Weedone LV6 in such a way that it contacted other persons either directly or through drift and applied the product directly to, or permitted spray mist to drift onto, cotton, okra, grapes, tomatoes, fruit trees, vegetables, flowers or other desirable crop or ornamental plants which are susceptible to 2,4-D herbicide.

3.27. The application of Element 4 by Respondent on October 16, 2013, as described above constitutes "use of a registered pesticide in a manner inconsistent with its labeling" as that phrase and those terms are defined in Sections 2(p), (u), and (ee) of FIFRA, 7 U.S.C. §§ 136(p), (u), and (ee).

3.28. The application of Weedone LV6 by Respondent on October 16, 2013, as described above, constitutes "use of a registered pesticide in a manner inconsistent with its

labeling” as that phrase and those terms are defined in Sections 2(p), (u), and (ee) of FIFRA, 7 U.S.C. §§ 136(p), (u), and (ee).

3.29. Pursuant to Section 12(a)(2)(G) of FIFRA, 7 U.S.C. § 136j(a)(2)(G), it is unlawful for Respondent to use a registered pesticide in a manner inconsistent with its labeling.

3.30. Pursuant to Section 14(a)(2) of FIFRA, 7 U.S.C. § 136l(a)(1), Respondent is subject to a civil penalty for having committed violations of Section 12(a)(2)(G) of FIFRA, 7 U.S.C. § 136j(a)(2)(G).
